Case Study. If Tier99 set up ex. GBSOU only, while GBLGP is a location that categorised as a equalised location port in OPUS

- ONEQUOTE only reflect schedule for GBSOU per Tier99 setup.
- ex. GBLGP vessel schedules will NOT appear on ONEQUOTE
- **In order to reflect both GBSOU and GBLGP, Pricer should include both GBSOU and GBLGP individually under Tier99**

- Set up the Route Type in TIGER Tier 99 MRG

- Pricers can flexibly control the schedule visibility and quotation
- Update the Route Type carefully - cannot add "T/S port" with "Route Type - Direct only" in MRG
- In case of mismatch route type vs PRISIM route conditions, ONE QUOTE **CANNOT** capture the quotation.

3. Please refer to below Screen on how to manipulate Port Pair Management in eCOM Admin

Recap of key points

- ❑ **ONE QUOTE offer = Snapshot/Spot offer**
- ❑ **Tiger Tier99 = ONE QUOTE offer**
- ❑ **Tier99 Maintenance = 5 times per week (Mon - Fri) → *to be confirmed***
- ❑ **ONE QUOTE MRG range = 6 weeks (1 wk cut off + 6 wks MRG = 7 wks)**
- ❑ **Current commodity group = FAK only**
- ❑ **Route Control = P1/ P2 + MRG optional (POL / POD /Transit/ Service lane)**

Ad-hoc Update

Q: Is Pricer allowed to add port pair?

- Np. adding new port pair is **NOT** allowed. Please update OFT and Premium rate during Ad-Hoc.

Q: What if new port pairs were included on Tiger on Tuesday or Wednesday? They would also reflect on Thursday?

- No guarantee to reflect during ad-hoc batch.
- Per standard process, new port pairs should include during regular batch update.

Regular MRG Data

Q: What are the Container type to be used?

- We only allow Dry General , Reefer dry and Live Reefer to be used as a Container type on ONE Quote as of the moment

Q: Thus using of Grouping Code/Location are allowed in OQ?

- We don't allow to use Grouping code/location at this stage until further notice

Q: What are the Commodity type to be used/indicated on the MRG?

- FAK commodity.
- You can also leave it as blank but note that system will always treat ONE QUOTE as "FAK"

Q: Trade Management wants to restrict certain Port Pair

- They can update the constraint route, Set up the space allocation to limit certain port pair or downgrade PRISIM route line up to P3(priority 3) **(OPUS SYSTEM)**

Q: Trade Management revise the Ocean Priority to P1/P2, thus missing Port Pair will appear immediately?

- As soon as eCom schedule is connected with the revised P1/P2, it will be dynamically reflected in OQ.

MRG Testing - New onboard pricer for test upload

Q: Where to upload MRG testing?

- Tiger TEST Environment for MRG input

Q: Trade wants to run a Testing for MRG upload in Tiger Test

- Need to submit SR for the particular Service scope/lane for testing and request for a manual run every Tuesday after the regular batch update. Please contact us for further arrangement.

Batch Cycle

Case: Vessel is delay and all deadlines are expired and the vessel should not appear for customers in scenario.

Q. How does the system work?

- If target VVD is delay and falls after the Batch cycle period/schedule, then this will not be capture by system.
In case VVD is delayed from proforma schedule and fall into MRG validity range then this will capture on ONE QUOTE.

Q. What are the validity range to be used by TM for uploading of MRG?

- We set up the MRG validity range to be used by TM in uploading their rate in Tiger, below link:
<https://drive.google.com/drive/folders/1mKc4yVqab--g6bpOwMbnDAwTbfaWPsPg>
- If the validity range set-up is not within the Batch cycle, schedule won't be populated on the system but validity can be shorter just make sure MRG validity is within Batch cycle.

Case: Port pair under Europe/Other trade was not captured in OQ system

- Check all possible reason/cases first :
<https://docs.google.com/presentation/d/1h19vXy68WsLrG0yrgD-71tp7zQlgn0Om/edit>
- Check also the Sold Out list file:
<https://docs.google.com/spreadsheets/d/1zzzYs2z3DjbU-z3bxi8Z90K2aIMJ5zN5jllXRdc42AA/edit>
- In case can't find the reason on our side, directly check with the IT team PIC

Case: Pricer missed to proceed “approval” in the MRG update.

- In case pricer forgot to approved their MRG upload and remain as "Initial" status, system will not capture the data for the next refreshment. System only count “Approval” MRG status.

Case: In the event of any error found in MRG at the time of batch refreshment in LIVE Platform

- We might not to support/rectify the error case due to Time difference
- In this case, we will just upload a whole batch data including error route in LIVE platform first (we cannot filter/remove error from the batch)

***** What we can do for incorrect MRG uploaded in LIVE platform***

- If Pricer can wait, they can update MRG during Ad-hoc Batch Refreshment
- * If Pricer can't wait, they have to remove the Port Pair from the Admin directly, then it will be immediately reflected on Customer UI /ONEQUOTE

After Uploading on ONEQUOTE

If you cannot find your port pairs on ONE QUOTE, please check below

Case 3) MRG route condition must be registered and matched with PRISIM route line up(Product Catalog).

Rate validity set up for initial launch scope

(new port pair or new service lane)

This is **ONE time** requirement for your **initial launch preparation**

(if you have any specific port pair/new service to work with, please follow the below step)

- After TM concluded the initial launch service and vessel voyage, then the rate effective date for each port pair should also be set as per target vessel voyage ETD of origin.
- If you apply 1 Rate validity for all port pairs, some route may capture 1 or 2 weeks earlier vessel voyages that calling to the particular origin.
